

**Continental**   
The Future in Motion

# For medium to heavy 4x4 vehicles and SUVs

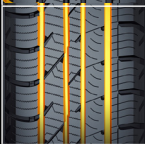

The ContiCrossContact™ LX.

- ▶ Four deep, wide and highly tapered circumferential grooves.
- ▶ High water displacement capacity and quick stone ejection.
- ▶ Very good aquaplaning protection and quick stone ejection properties.

# A high-performance tyre for on-road and general off-road use.

Technical highlights.

Image	Feature	Effect	Benefit
	Wide outside shoulder with wide lateral grooves	Traction and off-road look High lateral stiffness and therefore excellent cornering ability	Good driving and braking performance, even in light off-road use
	Four deep, wide and highly tapered circumferential grooves	High water displacement capacity and quick stone ejection	Very good aquaplaning protection and low risk of tyre defects because of quick stone ejection
	Three circumferential offset block rows with rib characteristics and very strong siping	Good driving stability The blocks are stepping smoothly and not parallel into the road surface	Precise steering response and very good directional stability Very quiet and smooth ride
