

# EK1000

## PASSENGER CAR TIRE

### Asymmetrical Tread Pattern Design

The outer tread pattern enhances traction on dry surfaces. The inner tread pattern accelerates water drainage and enhances stability to give you confidence on wet roads.

### Quiet, Superior Comfort and Fuel Savings

LNG (Low Noise Groove) design minimizes noise for a quieter ride. A special compound to provide a comfortable ride and fuel efficiency.

#### Uniform Tire Quality Grading

Treadwear	Traction	Temperature
500	A	A

Note: "INSIDE" and "OUTSIDE" on tire sidewalls mean tire fitting in correct position is needed for perfect tire performance.
