We'll make sure the adventure never stops.

## The WorldContact 4x4.

- ▶ Quiet running, excellent on-road handling and outstanding tread life.
- ▶ Exceptionally precise steering and high stability.
- ▶ High levels of on-road stability and comfort while being extremely capable in off-road conditions.

# A tyre designed specifically for the rugged Southern African conditions.

## Technical Highlights

### Features

Broad intermediate tread blocks combined with central circumferential tread block rib.

Rugged and square shoulder blocks with strengthening tie-bars.

Computer optimised tread geometry.

Durable belt pack and sidewall construction.

### Benefits

Puts more rubber on the road and provides superior levels of traction, on-road stability and steering response.

Provides higher levels of on-road cornering stability and greater levels of traction in off-road conditions.

Provides further reductions of on-road noise levels and increased driver comfort, coupled with improved wet braking capabilities.

Provides increased resistance to penetrations and punctures.
