

ULTRA HIGH PERFORMANCE TYRE

ATREZZO ZSR

Excellent Drainage Performance
Grooves with varying widths efficiently drain water to reduce hydroplaning and improve fuel efficiency.

Noise Emission
The various groove angles evenly distribute vibrations generated while running to reduce noise emissions. The design has been measured to reduce noise emissions by about 3%.

Longer Tread Life
Through our testing, we have ensured greater driving stability and promoted uniform wear by increasing the tyre's ground contact area by 6%.

PERFORMANCE RATINGS:

The new generation **ATREZZO ZSR** is engineered to deliver precise wet and dry handling performance. With an asymmetrical tread design and enhanced tread rubber formula, Atrezzo ZSR rises to the challenge and provides exceptional performance on the street and on the highway.

- Asymmetrical tread design for uncompromising performance.
- Wide shoulder blocks and high angle sipes improve high speed performance.
- Variable pitch tread design provides a smooth, quiet ride.
- Advanced tread compound delivers superior cornering and exceptional handling.
- Deep, circumferential grooves and hundreds of biting edges deliver excellent wet and dry traction.

High Speed Stability
The central rib pattern improves high speed stability to improve driving comfort.

Cornering
The reinforced shoulder design improves grip for effective corner capabilities.

1 Special tread compound formula reduces rolling resistance and improves skid resistance.

White Carbon Black Filler

White carbon black filler sticks better to the body of the tyre which creates less friction. This greatly reduces the tyre's rolling resistance. White carbon black filler is more flexible making it better at absorbing shocks from road deformations and improves grip.

Carbon Black Filler

2 Main tread rubber material greatly improves hydroplaning resistance to provide you with a safer ride.

High content of Styrene Vinyl which provides great hydroplaning resistance.
